## 40T Terminal Port Container Truck Semi Trailer

Ultraton's 40T Container Terminal Semi Trailer is an ideal and practical way to handle containers by Low-speed tractors in specific areas such as terminals or container diversion centers efficiently. It can be modified according to customer's requirement.

### Overview of 40T Terminal Port Container Truck Semi Trailer

- Space frame welded structure, which is formed by welding two I-shaped longitudinal beams and a plurality of beams (C-shaped channel steel).
- Steel material we choose to use is high strength steel Q345.
- Whole body is welded by advanced automatic submerged-arc process and skilled technicians. Complete chassis shot blasting to clean rust and remove welding stress.
- Superior quality and famous brand we use on specific different trailer parts. Details are outlined as below.

### Advantage of 40T Terminal Port Container Truck Semi Trailer

1. Mature technology, could be produced in large quantity at competitive cost
2. Lighter weight with high strength to transport container
3. Shipped both by container, or RORO, bulk shipment.
